stability to ensure
consistent, accurate
strap placement

MHG Signature Bundling Machine

Complete with the latest technology, Signode's revolutionary MHG Signature Bundling Machine is far simpler to operate and maintain than any other signature bundling system currently on the market. The MHG combines fewer parts with a streamlined design to help lower maintenance costs and improve signature quality.

Easily adaptable to your stacker specifications as a self-contained unit with a moveable cart or a bolt-on unit with adapter plates.

- Accommodates vertical or horizontal applications
- Custom chute sizes available

Minimize downtime

Modular design

The MHG's innovative modular design consists of separate feed and seal modules, each weighing less than 30 lbs. These lightweight, compact modules are easy to access and can be changed out quickly for routine maintenance.

Feeder module

Sealer module

Fully accessible strap path

A hinged door, easy to reach and open, on the feed module makes the strap path fully accessible.

Two position strap dispenser

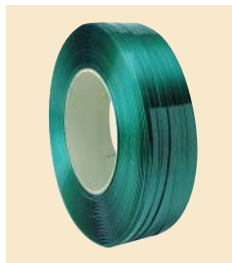

The MHG's two position strap dispenser reduces coil replacement time, minimizing downtime.

Tenax® Polyester Strapping

Enhance the performance of your MHG Signature Bundling Machine with Signode's Tenax® polyester strapping.

- Consistent width and gauge control
- Smooth, uniform surface
- Resists splitting
- Recovers when elongated
- Recyclable

Specifications

Minimum center to center: 8.5"

Minimum height: 15"

Strap size: 7/16 or 1/2" polyester or polypropylene

Feed rate: 12 feet per second

Tension range: Up to 30 lbs

Weight:

Feeder module: 20 lbs

Sealer module: 30 lbs
